PROFESSIONAL SUMMARY

Python Developer and Data Analyst skilled in Python, SQL, Power BI, Machine Learning, Flask, and Data Visualization. Experienced in Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Development, and REST API Integration. Strong problem-solving abilities with expertise in transforming data into actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analytics & Visualization: Power BI, Excel, Pandas, NumPy, Matplotlib, Seaborn, Streamlit

Machine Learning: Scikit-Learn, Regression Models, Classification Models, Feature Engineering

Backend Development: Flask, REST APIs, API Integration, JSON

Databases: MySQL

Developer Tools: Git, GitHub, Postman, Jupyter Notebook, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis

EDUCATION

B.Tech – Computer Science & Engineering (Data Science)

2022 – 2026

Sri Venkateswara College of Engineering & Technology, Chittoor, Andhra Pradesh

CGPA- 9.02/10

Intermediate (MPC)

2020 – 2022

A.P Model School & Jr College Nallacheruvu | Andhra Pradesh

69%

SSC

2019 – 2020

A.P Model School & Jr College Nallacheruvu | Andhra Pradesh

90%

EXPERIENCE

AI Intern – TechSaksham (Microsoft & SAP Initiative) Remote

EduNet Foundation

- Worked on AI and Machine Learning applications using Python for data analysis, preprocessing, and predictive modeling tasks.
- Analyzed datasets using analytical techniques to identify patterns, generate insights, and support data-driven decision-making.

PROJECTS

Superstore Sales & Profit Analysis | *Python, Power BI, Machine learning*

- Performed data cleaning and exploratory data analysis using Python to identify sales trends and profitability factors.
- Developed machine learning models, Power BI dashboards, and Streamlit applications for KPI tracking, business insights, and monitoring.

Weather Monitoring & Prediction System | *Python, Flask, Machine Learning, REST API*

- Built a Flask-based weather application integrating APIs to display and process real-time weather data across multiple locations..
- Developed machine learning models and interactive visualizations for weather forecasting, trend analysis, and prediction accuracy.

AI-Based Job Recommendation System | *Python, Flask, NLP, REST API*

- Developed an NLP-based recommendation system to analyze resumes and match candidates with relevant job roles effectively.
- Built a Flask backend for resume processing, skill extraction, and personalized job recommendations with improved accuracy.

CERTIFICATIONS & ACHIEVEMENTS

- AI: Transformative Learning with TechSaksham – Microsoft & SAP
- Basic Python – Infosys Springboard
- Full Stack Foundation – L&T EduTech
- UI & UX Developer Certification – L&T EduTech
- First Place – Mathematics Quiz Competition

ADDITIONAL INFORMATION

Languages: English (Professional), Telugu

Interests: Data Analysis, Dashboard Development, Python Development, Machine Learning, Problem Solving, Data Visualization
